# LM Microfactories: Design, Build and Sell locally

**Co-creation**  
with 51000+  
community members  
in 130 countries

**Microfactories**  
Local production units  
powered by Direct Digital  
Manufacturing

**LM** Case 1: Rally Fighter from Sangho Kim, South Korea | World's 1st Co-Created Car - 18 months

**LM** Case 2: Flypmode from Victor Garcia, USA | World's First Co-Created Military Vehicle - 5 months

**LM** | 3D Printed car Challenge: Over 200 entries

**LM** Case 3: Strati from Michele Anòè, Italy | World's First 3D printed car

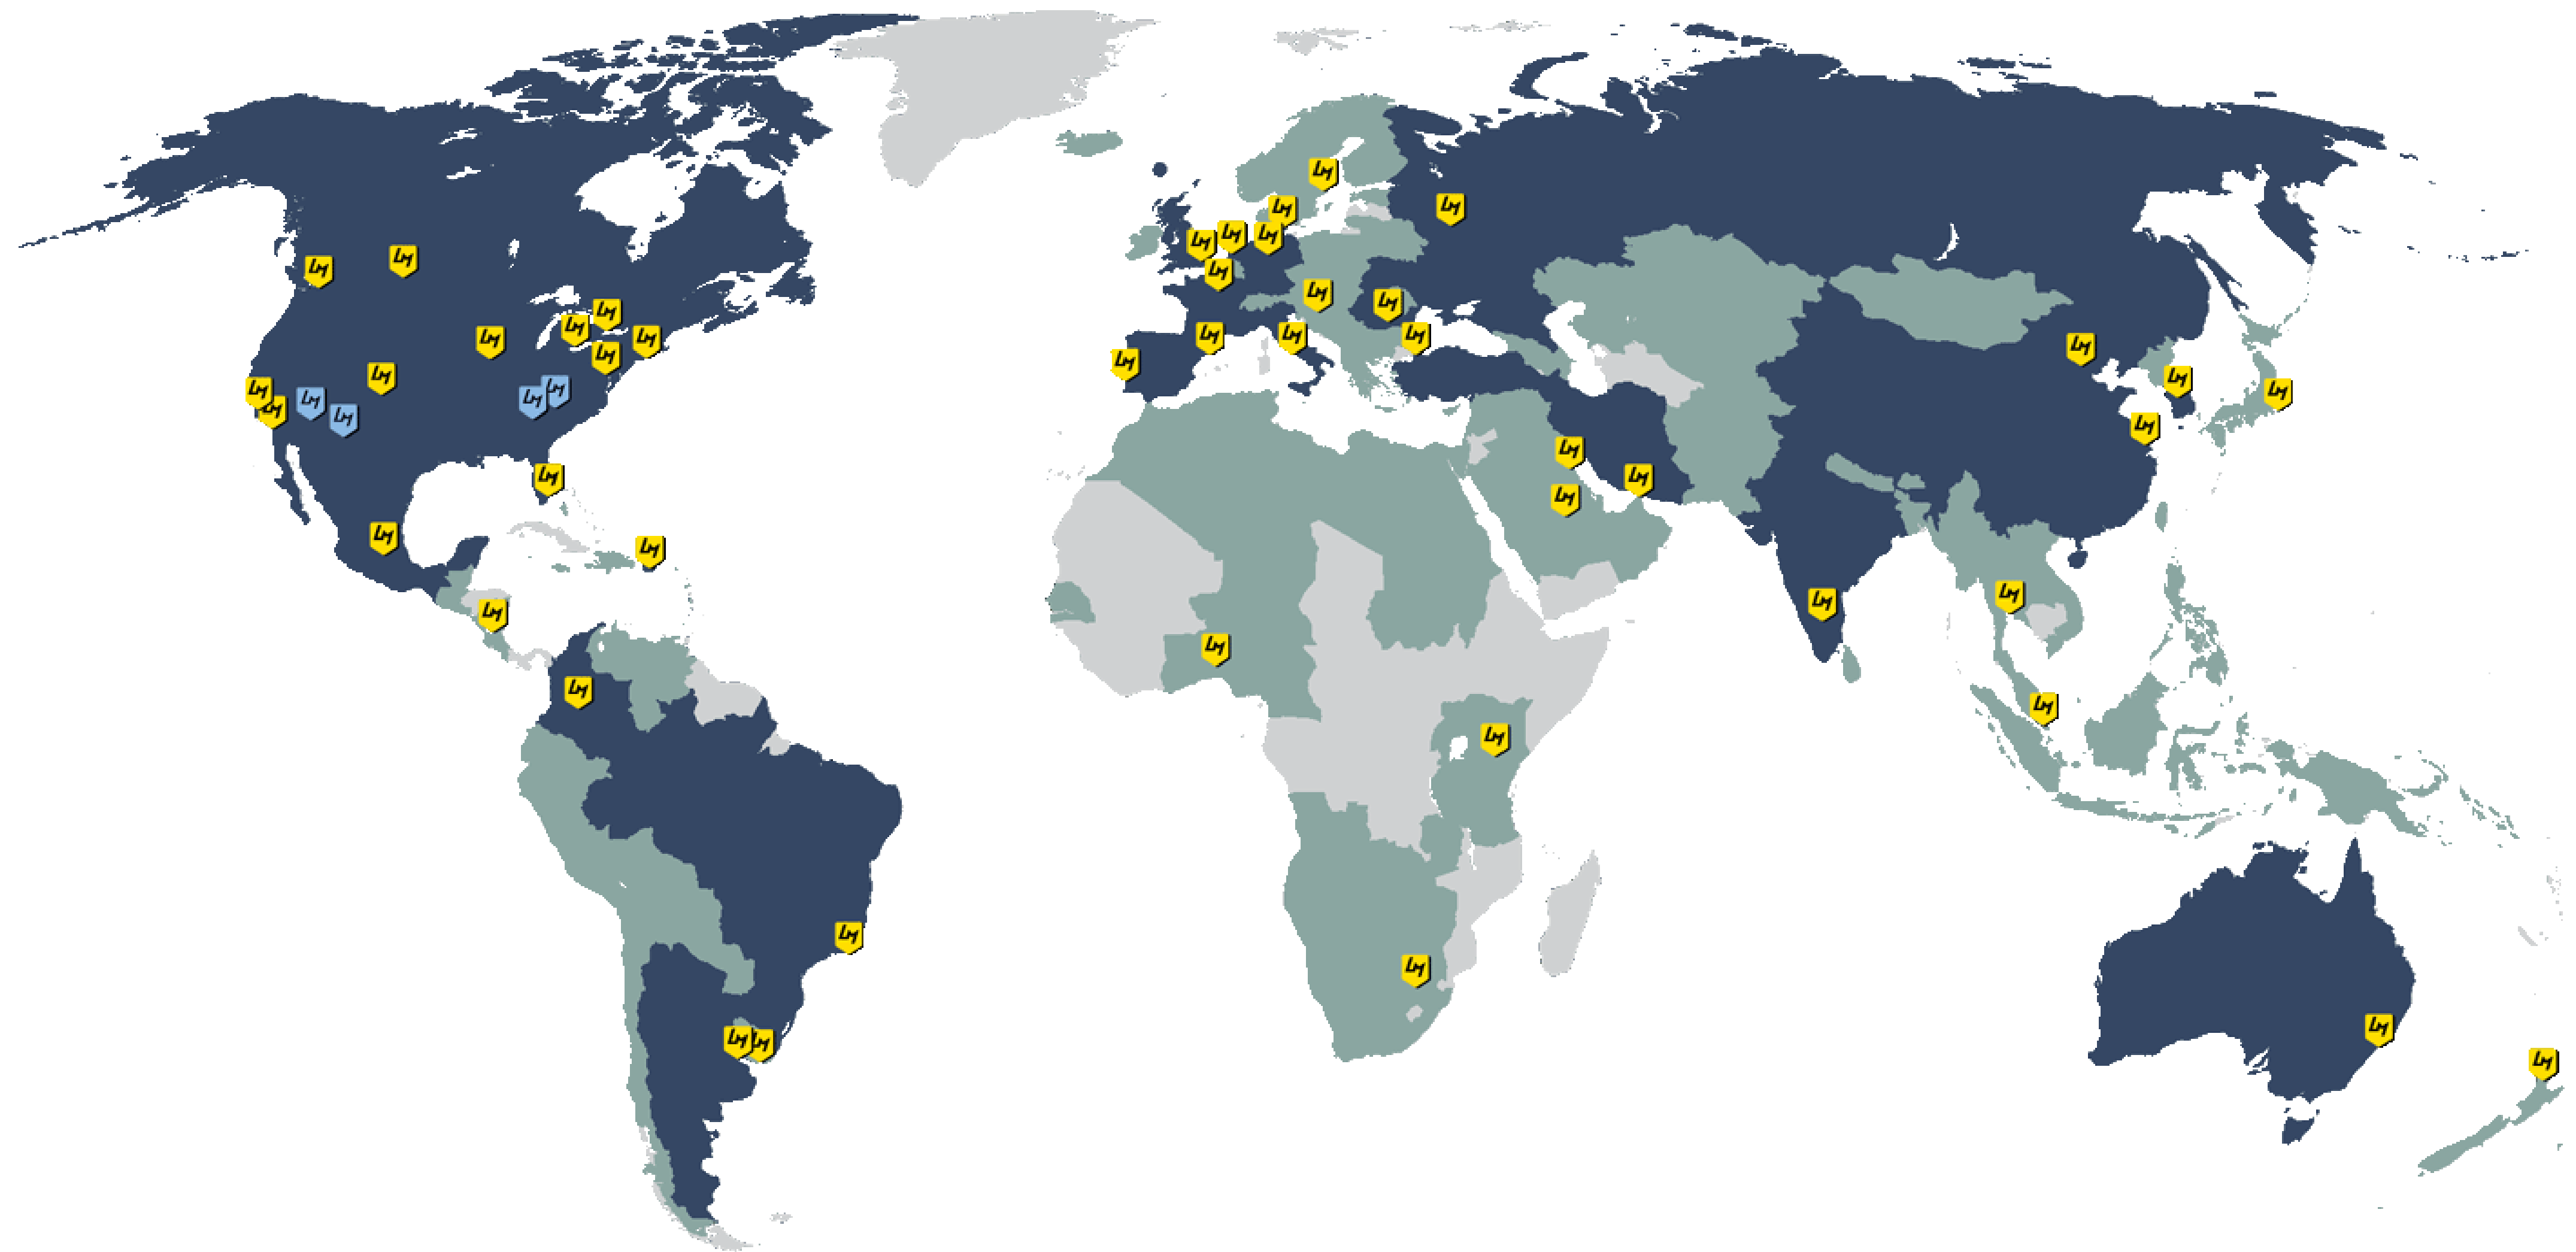

# Expanding the network of Microfactories: Co-Creating locally relevant vehicle eco-systems

Urban Mobility  
**Challenge**  
**Berlin 2030**

A light gray background map showing a city street grid. A yellow line highlights a specific route that starts on the left, moves right, then diagonally down-right, and finally diagonally up-right towards the top right. Several small black dots are placed at key intersections along this highlighted path.

# Mobility Revolution

# EDGAR SYSTEM

Dynamic driverless vehicle system

# The 4 elements of the system

## Multi-Modal Trip-Planning

On-demand or pre-defined route

## Registration

Service optimization based on usage patterns

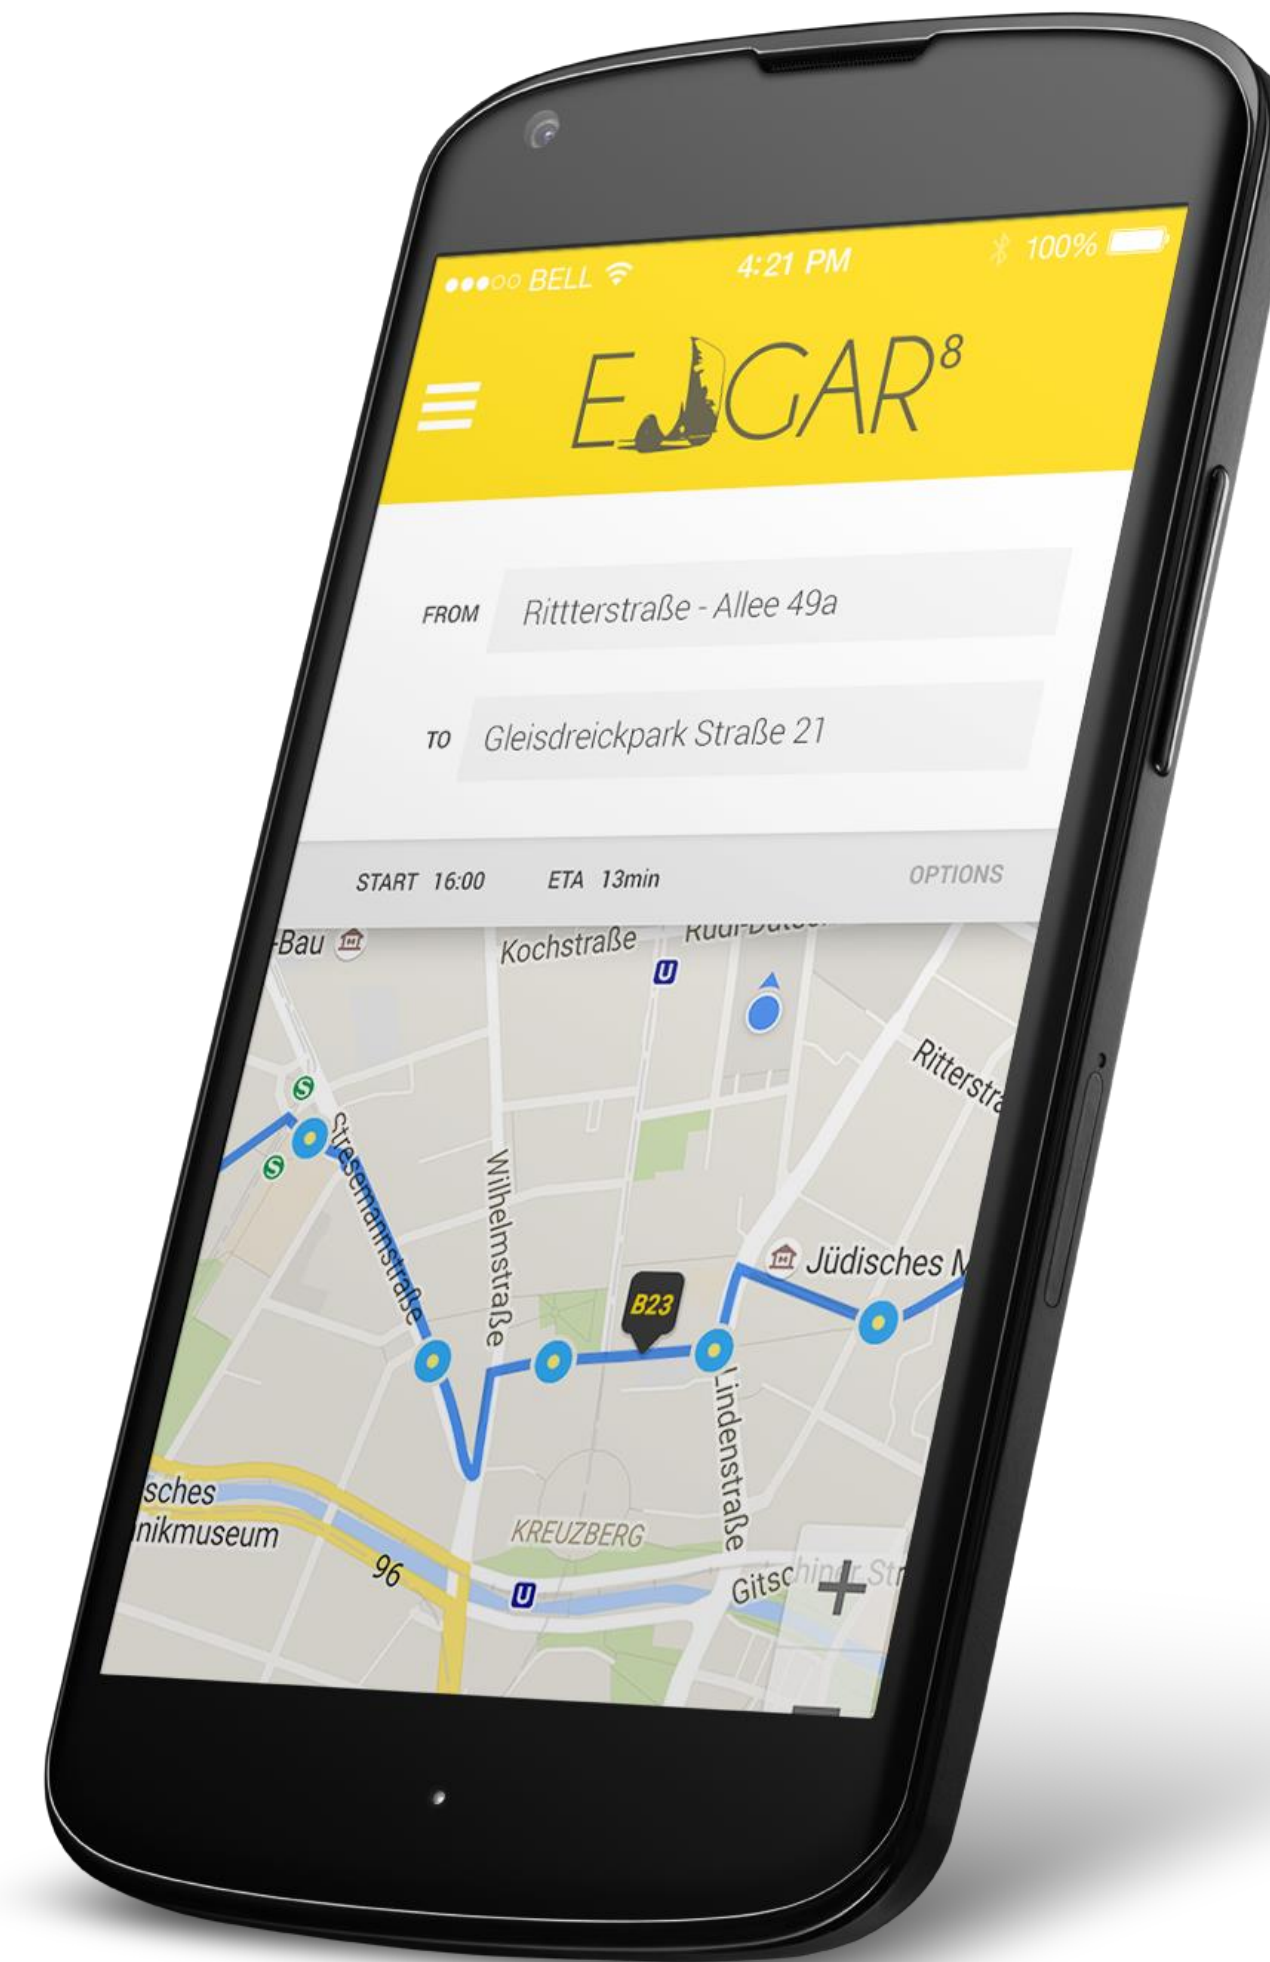

## Ticketing

Integration of existing ticketing schemes

## Billing Interface

Integration of various payment mode

**LM** | **First vehicle:** Edgar08 - Autonomous upgradable minibus for 8 people

# **LM** | Edgar08: Beautiful and sustainable

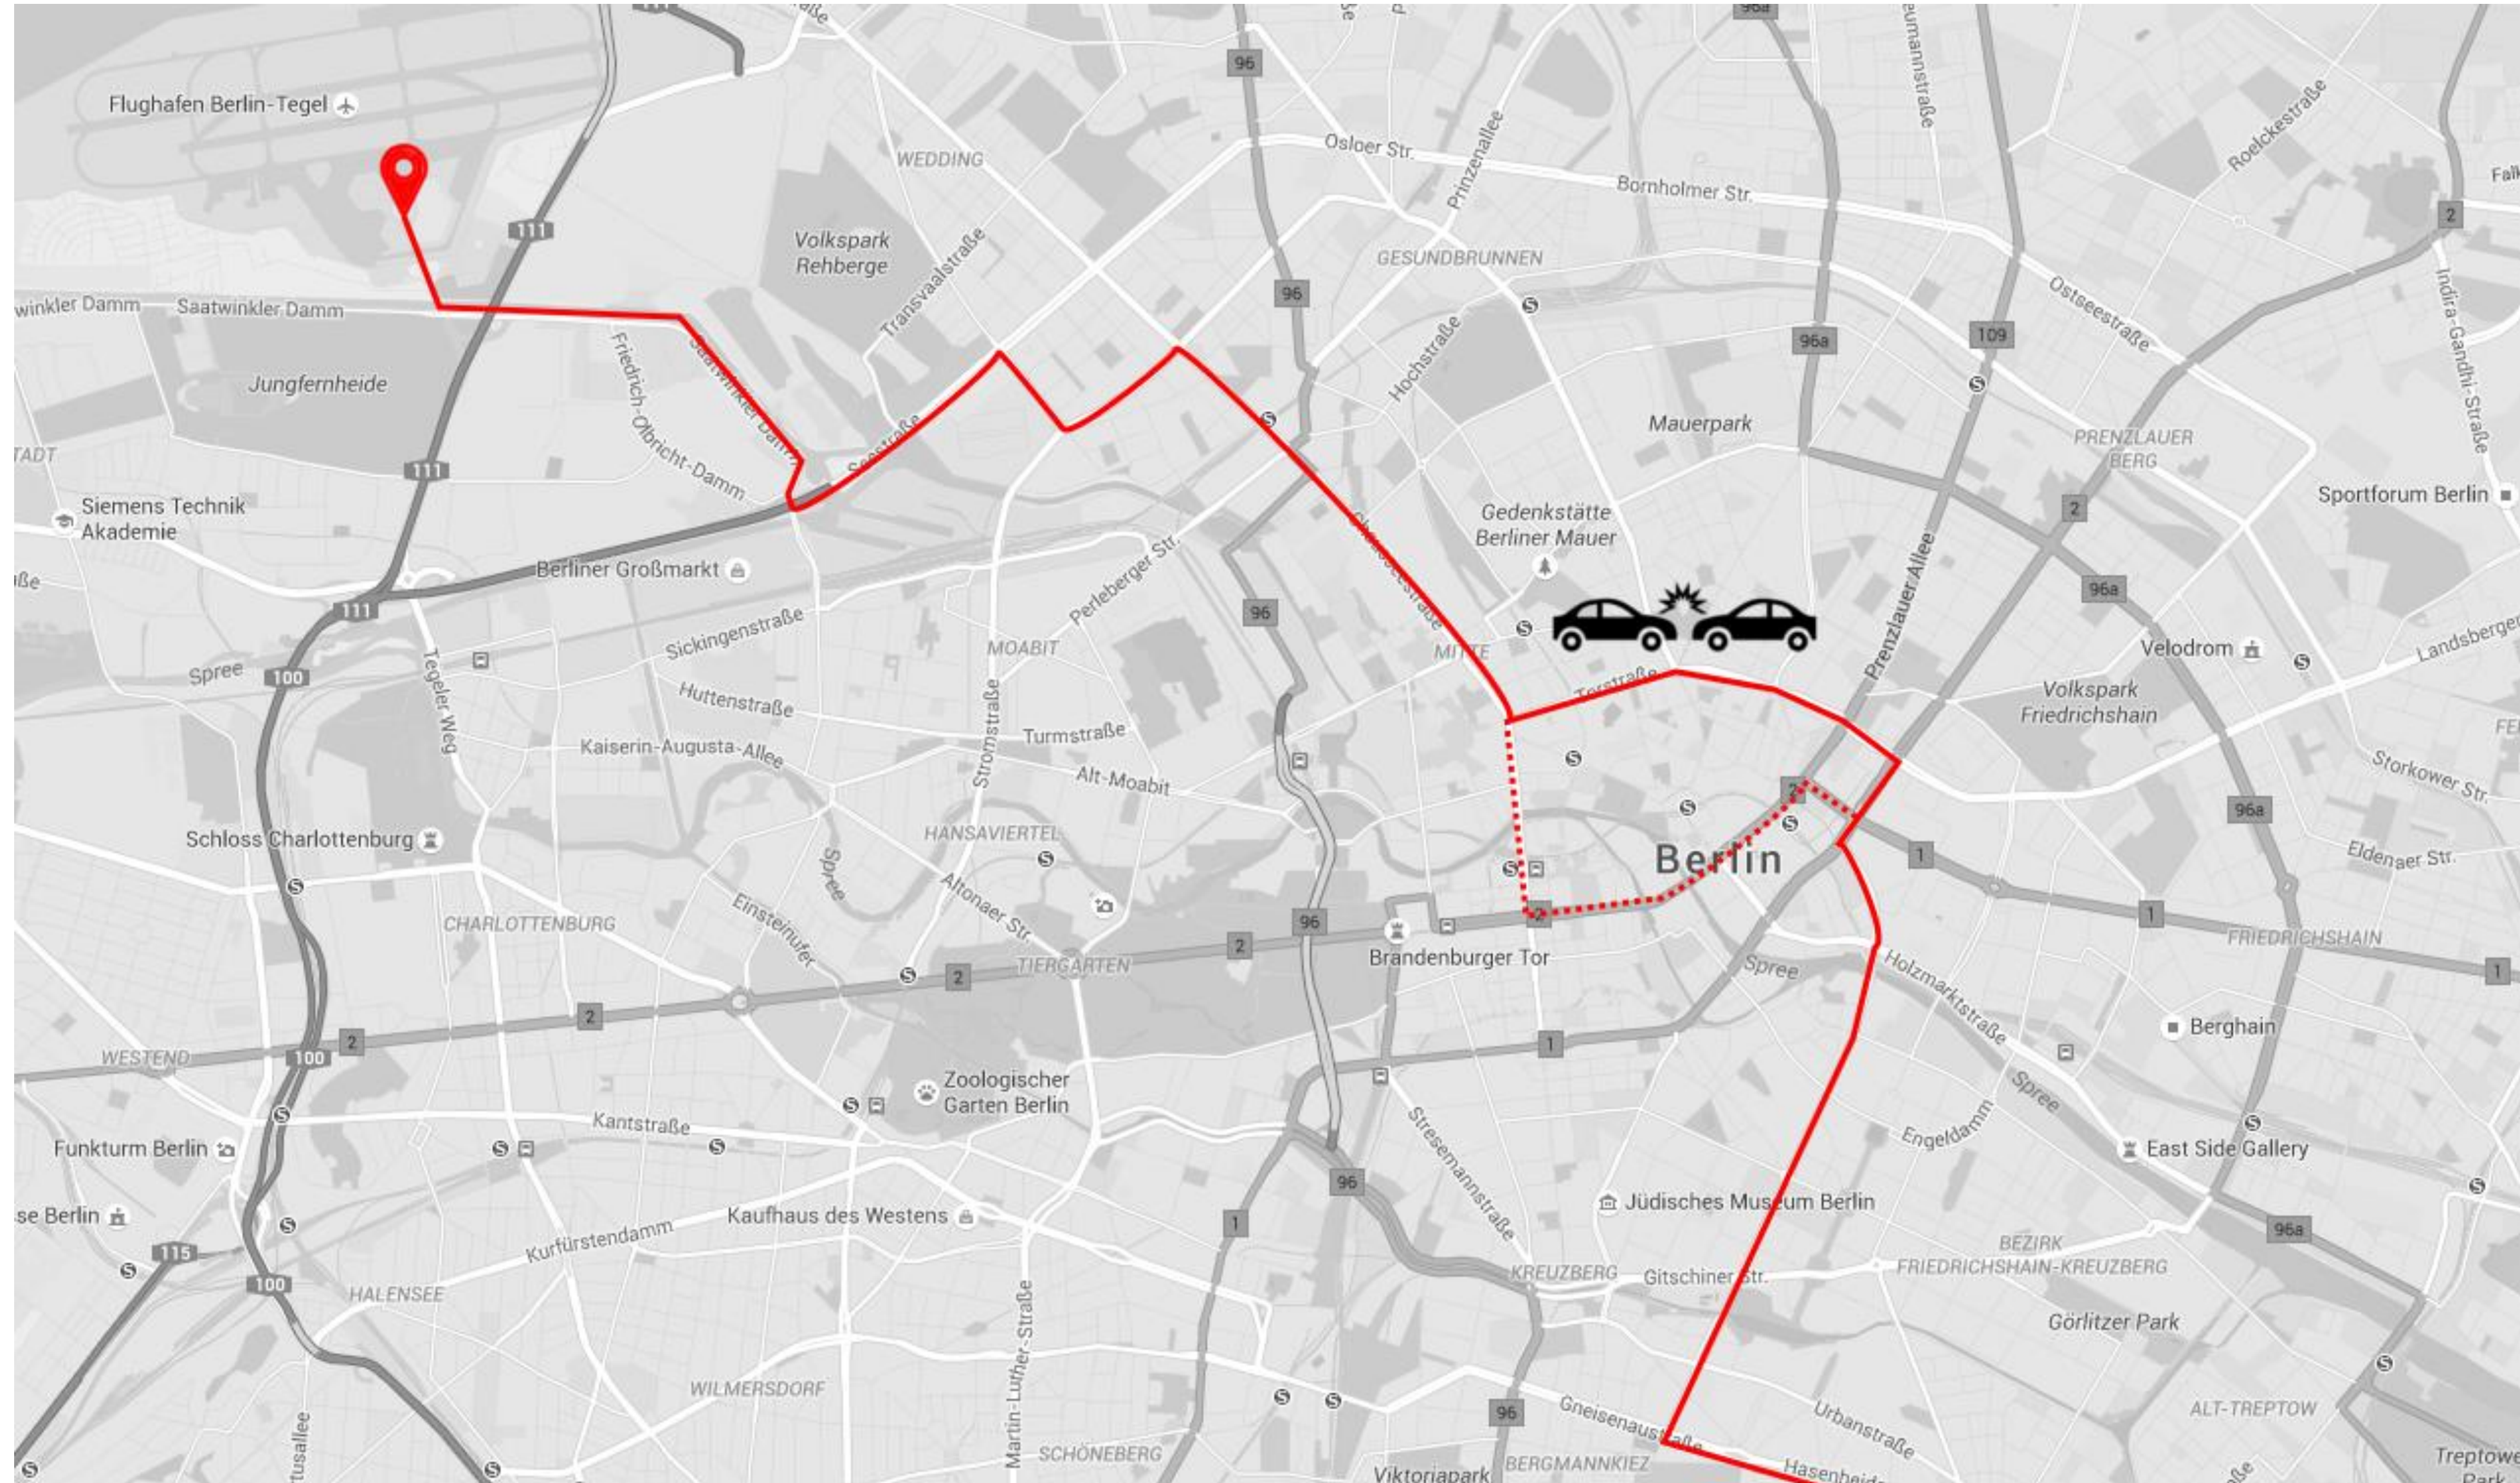

# LM Edgar08: Smart and accessible

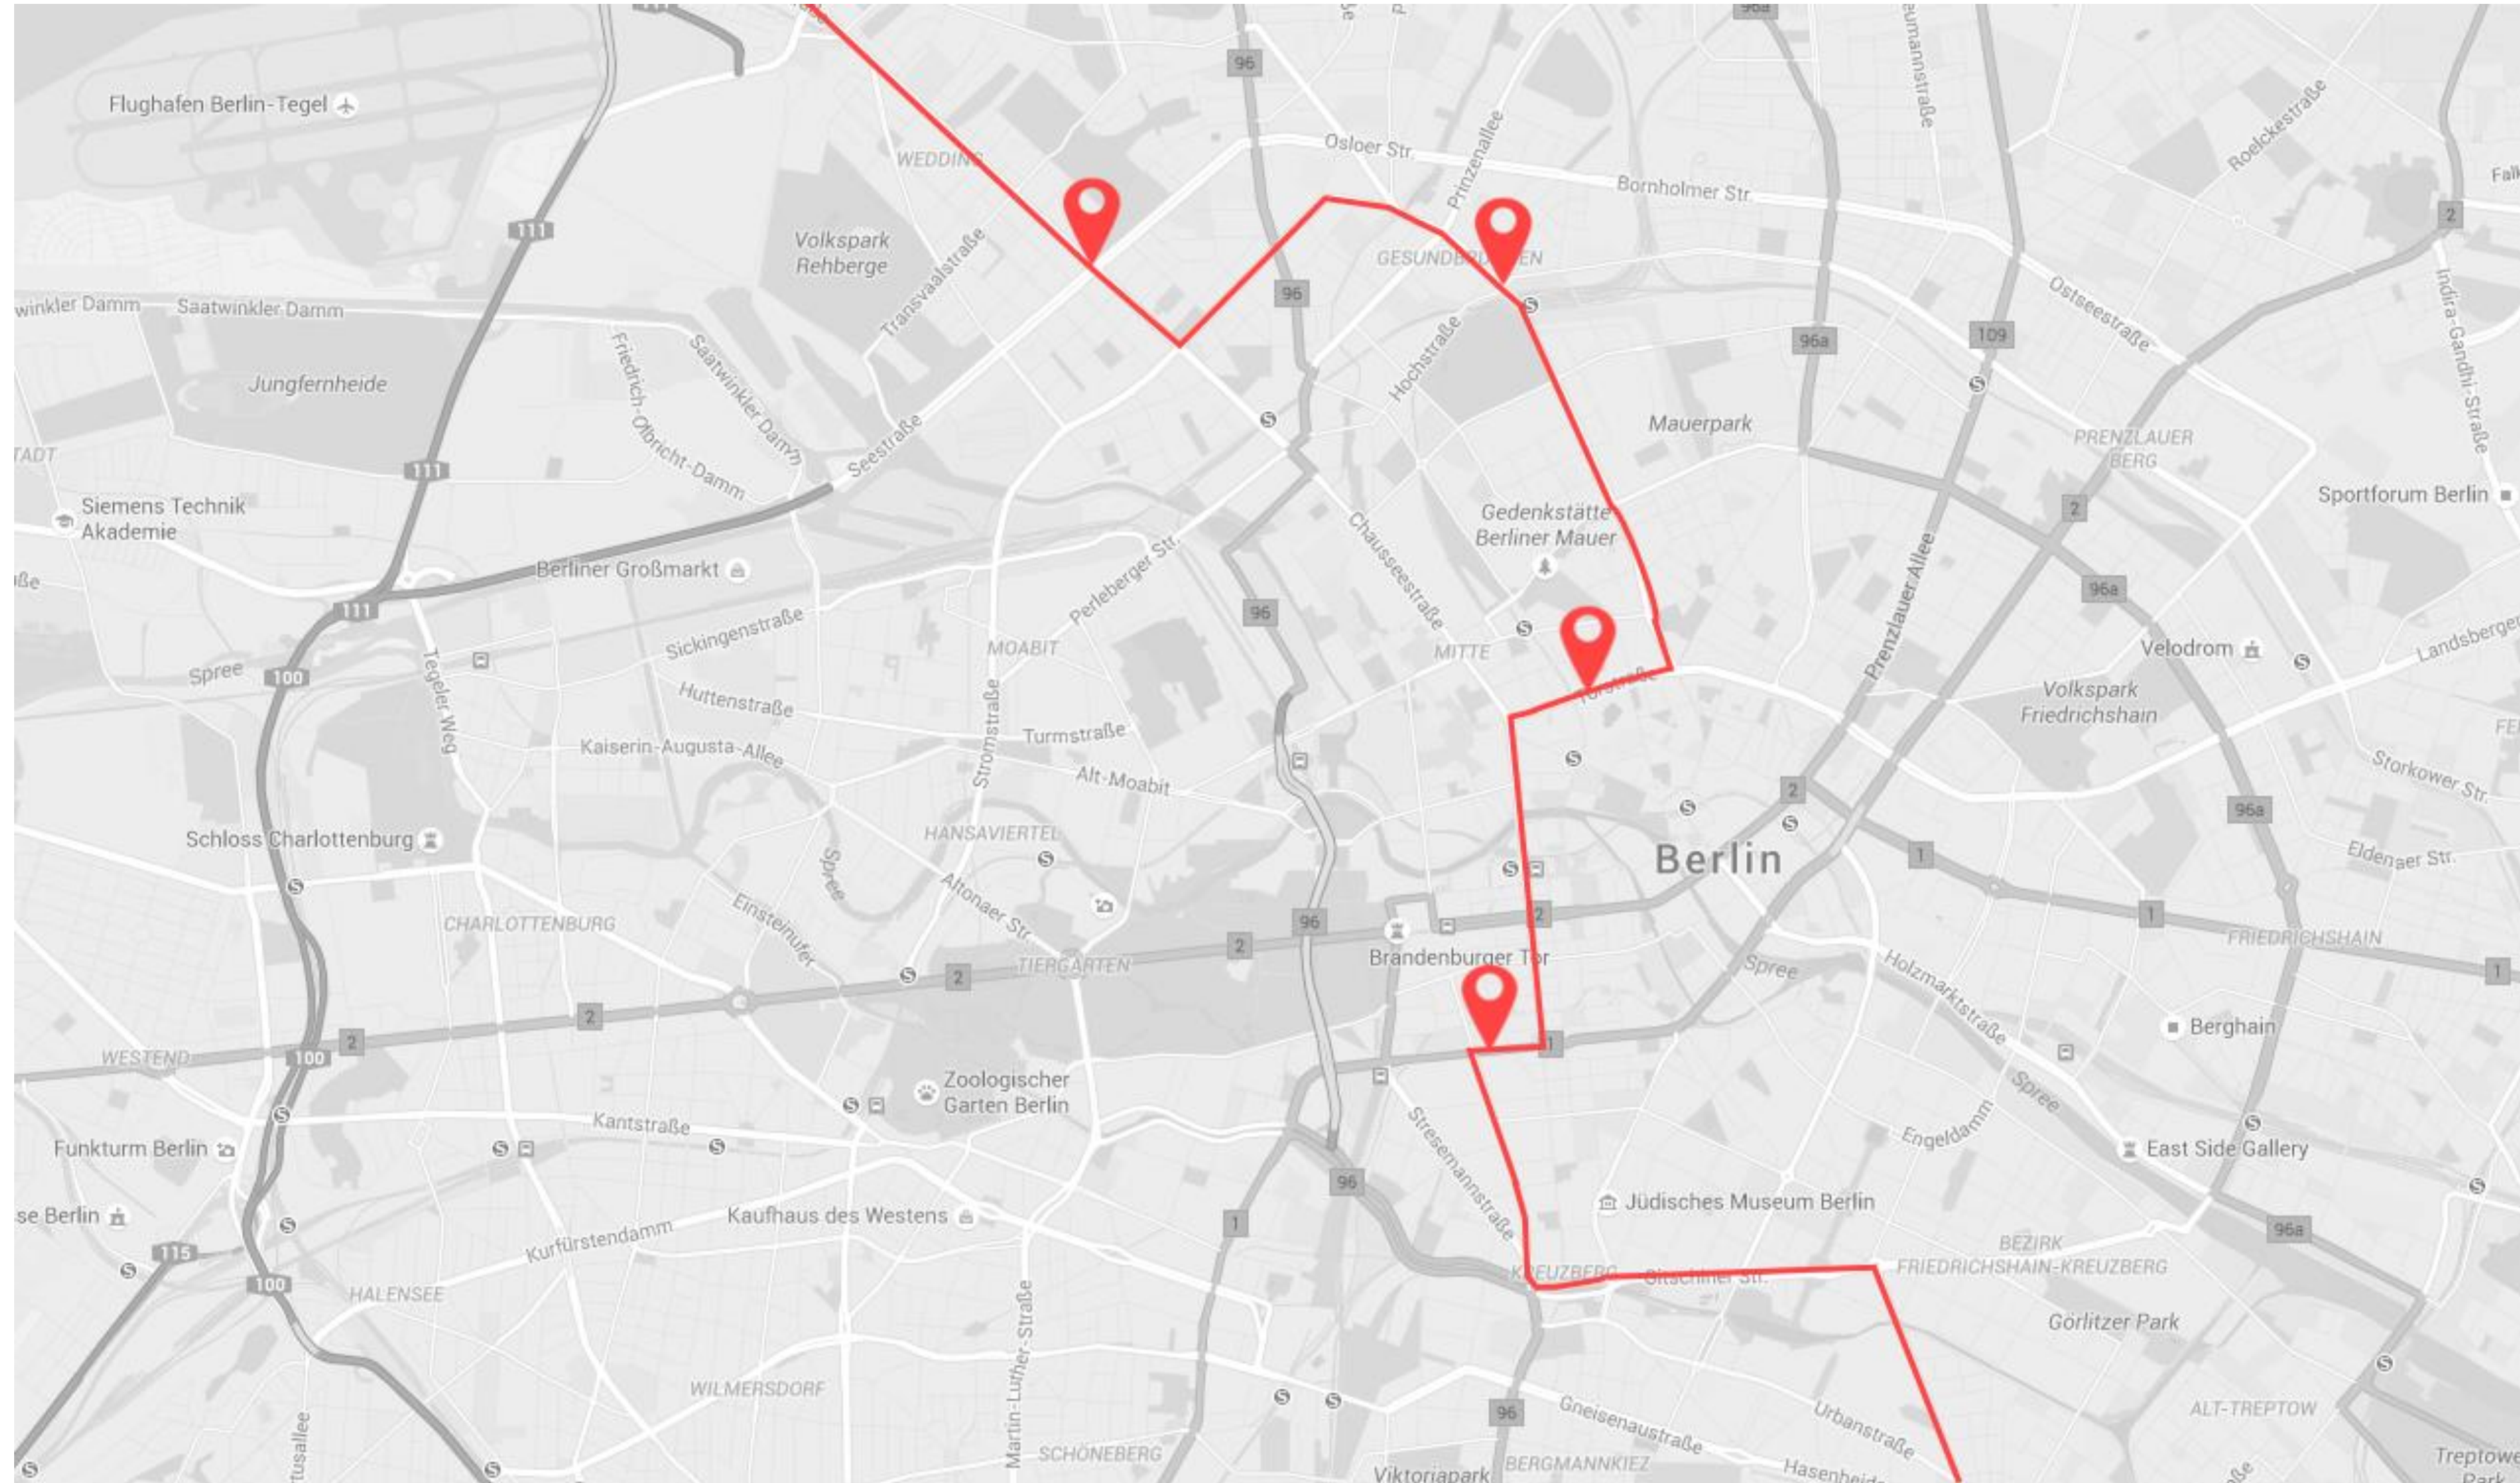

# Dynamic trip planning: Autonomous self re-routing according to real time traffic

# Machine learning optimization: Autonomous self dispatch according to historical data

## Fleet Management

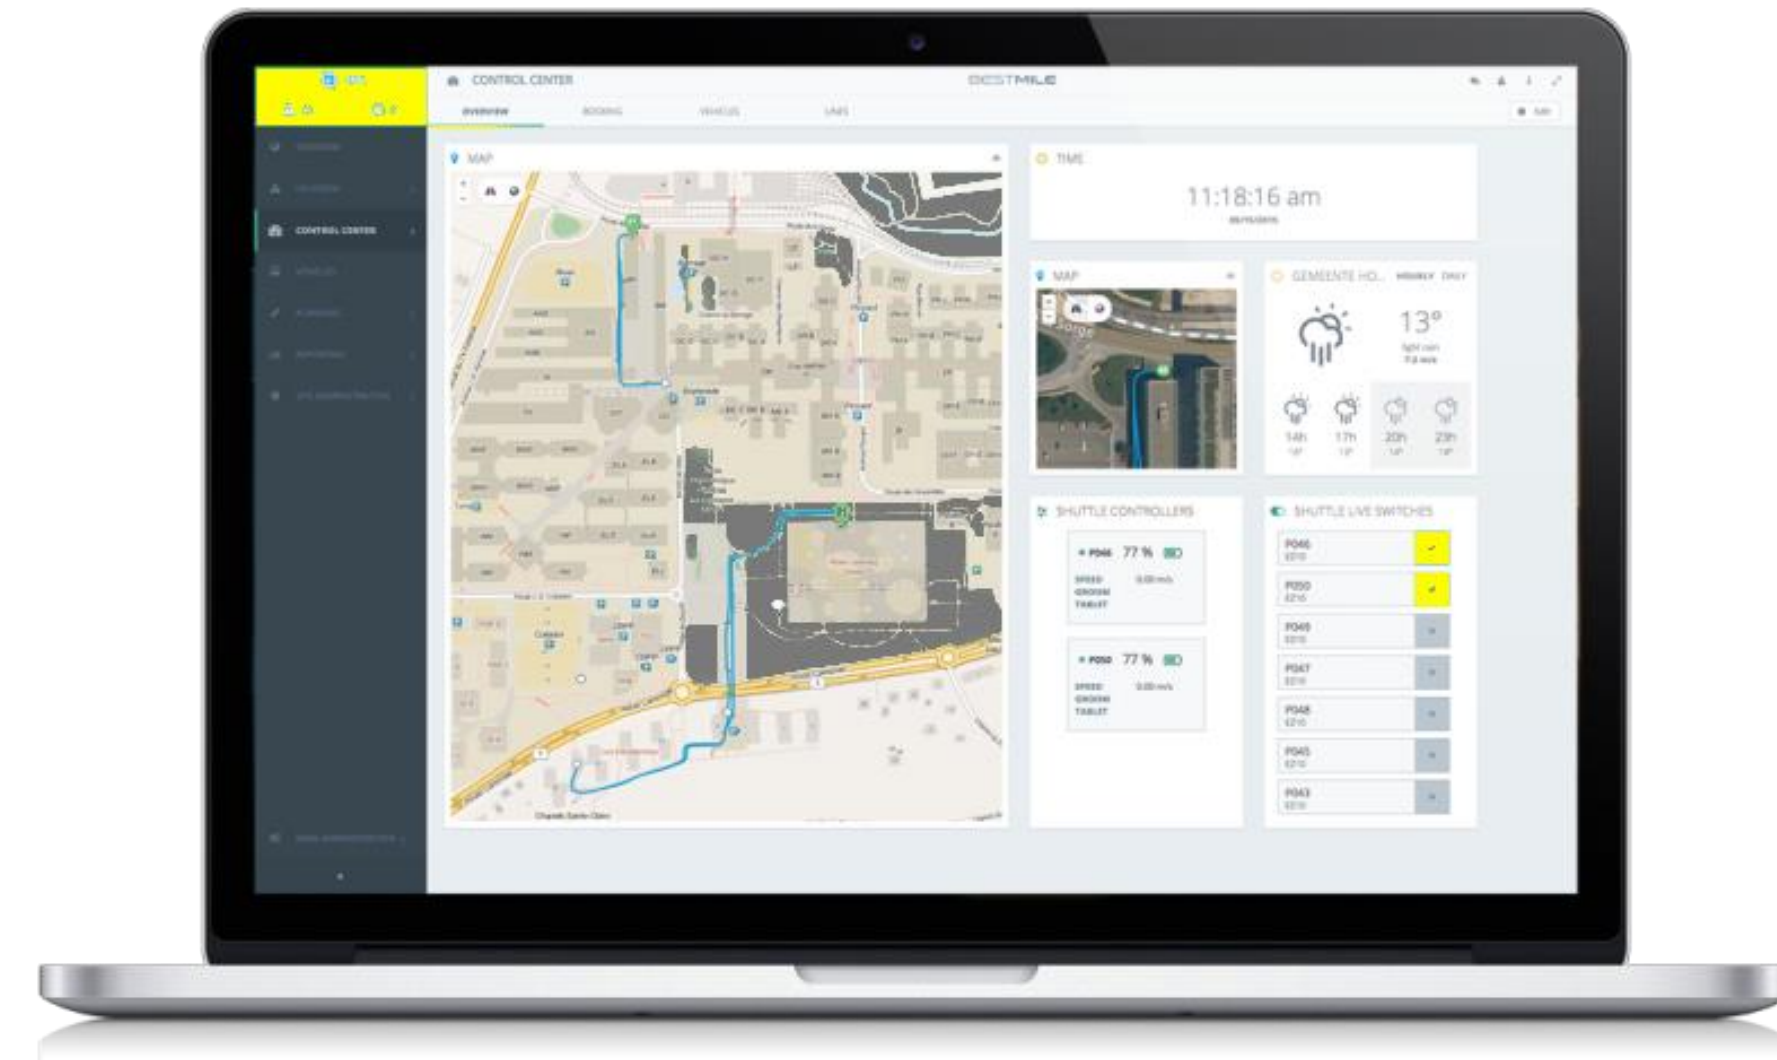

Recharging

Maintenance Planning

Fleet Sizing

## Vehicle Supervision

Route Optimization

Load Balancing

Vehicle Monitoring, incl. emergency handling

## System integrations

Other modes of transportation

## Project Scoping and fleet commissioning

We dive into your application to provide fleet sizing and define the vehicle specifications. We then setup the operation.

We check, inspect and test every operational component and validate the system.

## Fleet Operation

We handle fleet operation and vehicles maintenance and provide peace of mind.

That includes up-to-date, safe and reliable software and emergency services.

## Upgrades

The world is dynamic, so is the system. From fleet mix extension to vehicles upgrades, you are covered.

You are not locked in a rigid configuration or into infrastructure and investments.
